

TRACK CHAIR BIOGRAPHY

María Belén González Fonteboa

Professor

University of A Coruña, Spain

Belén González-Fonteboa is full professor at the University of A Coruña in Spain. She is Civil Engineering and during her academic career, she supervised more than 25 master works and 8 PhD dissertations, some awarded by the “Real Academia de Doctores de España”, by “Hijos de Rivera”, by “Real Academia de Doctores de Galicia”. Her main research lines are related to the analysis of the possible recovery of different by-products in the construction field: mussel shells, ashes from different industrial activities, and construction and demolition wastes. The studies aim to develop new eco-concretes and mortars using, in addition, innovative control systems and instrumentation. These research lines have been developed throughout more than 40 research projects and more than 20 contracts with private companies. From the research works, she has published more than 80 journal papers. Finally, she belongs to the editorial team of five JCR journals and collaborates with administrative agencies in the evaluation of research and academic activity.
